CULTURAL DIRECTIONS FOR PLANTING OUR BULBS

Spring Flowering Bulbs can be planted from September to December. They require a moderately rich soil which should be well drained. If the soil is in poor condition use a little bone meal or well-rotted manure. Fresh manure is injurious to bulbs. When the soil is heavy or stiff, place a small quantity of sand or coal ashes at the base of each bulb. A good rule to go by is to cover the bulbs with soil one and a half times their own depth.

GENERAL CULTURE DIRECTIONS

DEPTHS AT WHICH BULBS SHOULD BE PLANTED

The accompanying diagram explains the proper depth to plant bulbs. Outdoor planting should be done early in the fall to obtain best results.

WHEN AND HOW TO ORDER BULBS

The best time to order your bulbs is just as soon as this catalogue reaches you. The bulbs may not have arrived by then, but your order will be given immediate attention, and be filled just as soon as the stock arrives. At the first of the season there are no sorts sold out, and besides the bulbs flower better when planted early.

Please be sure to write plainly your full name and address, when sending us your order and remittance. Send also the name of the nearest express office, if bulbs are to come that way, when it differs from the post-office. We send bulbs by express, unless postage for the different sorts, as shown in the catalogue, accompanies the order.

Non-Warranty

Most of the failures with seeds, plants and bulbs are due to causes entirely beyond our control, such as unfavorable weather, too deep or too shallow planting, slugs, etc., therefore Hallawell Seed Co. give no warranty, express or implied, as to description, purity, productiveness, or any other matter of any seeds, plants, bulbs, etc., they send out, and will be in no way responsible for the crop; if the purchaser does not accept the goods on these terms they are to be returned at once.

If you wish the bulbs to be sent by PARCEL POST, please add sufficient postage to cover the cost of mailing, excepting where marked postpaid. Under each heading we have marked the approximate weights of the various sorts so that you can figure out the postage due according to the zone. If too much postage is allowed we will adjust by sending extra bulbs.

Hyacinths

Hyacinths are very fragrant and come in a great variety of colors. They make a magnificent display when grown outside in a bed. They are also very satisfactory when grown in pots or in glasses of water. We are listing the single type only as they are far superior to the double and more certain to bloom. Set the bulbs so that the tops will be 3 or 4 inches below the surface and 6 to 12 inches apart. For pot culture use a 4-inch pot for a bulb or a large pot for 2 or 3 bulbs, and leave the tops of the bulbs just above the surface. After potting give a good watering and set away in a cool cellar until thoroughly rooted, when they can be brought into the house.

Hallawell's "Quality" Tulips
FOR CALIFORNIA

The Cottage and Darwin Tulips are more satisfactory for California than the early shorter stemmed varieties, as the large blossoms are borne on strong long stems from 20 to 30 inches tall. They bloom in May and make a beautiful effect when planted in a bed or in groups.

Tulips can be planted from October till late in December. They require a moderately rich soil which should be well drained. If the soil is in poor condition use a little bone meal or well rotted manure. Plant the bulbs 6 or more inches apart and set the tops 4 inches below the surface. If the soil is heavy, place a small quantity of sand at the base of each bulb. In the following list you will find the leading varieties which are certain to give satisfaction.

Daffodils

The following list contains the best varieties. Daffodils bloom in March and April. The blossoms are borne on tall strong stems and are fine for cutting. They bloom freely and are very effective when planted in a border or a bed.

For pot culture, plant 3 or 4 bulbs in a 5-inch pot and leave the tops of the bulbs just above the surface. After potting give a good watering and set away in a cool cellar until thoroughly rooted, when they can be brought into the house. For outdoor culture set the tops of the bulbs 4 inches below the surface and 12 inches apart.

SPANISH IRIS

One of the most satisfactory varieties of Iris to grow, being perfectly hardy. The flowers are of great beauty, having many different blendings of color, and if cut when in the bud state will last a long time in water. For best effect they should be planted in clumps or masses of 25 to 100 or more bulbs set 6 inches apart and 2 to 3 inches deep. They grow 18 to 24 inches high and bloom from end of April on through June.

The following list contains only the long stemmed sorts:

(Postpaid per doz., and 100.)

Belle Chinoise: deep golden yellow.

Blanche Superbe: pure white, yellow blotch.

IRIS PALLIDA DALMATICA

(If by parcel post add postage at zone rates weight per doz., 3 lbs.)

One of the finest of the German type, of strong vigorous habit attaining a height of four feet in good soil, with exceptionally large fragrant flowers. Standards lavender, falls lavender shaded blue; an excellent variety; 25c each; \$2.50 per doz.

Dutch Iris

DUTCH IRIS

This new strain resembles the Spanish Iris, but their whole habit of growth is more vigorous; the stems and foliage of some varieties approach those of the English Iris, the flowers being similar in general appearance to those of the Spanish; are large with very conspicuous orange blotches on the wide falls. Their greatest value consists in their earliness as the buds open at least two weeks before the Spanish Iris. We offer four fine varieties.

Amaryllis produce clusters of three to six large trumpet shaped flowers on leafless spikes two to three feet high, the foliage appearing after the plant is through flowering. They are fine for planting in a high border or for pot culture.

Barely cover the bulbs when planting, set one foot apart in a place where they can remain undisturbed.

(If by parcel post add postage at zone rates weight of one bulb, 10 oz.; of 1 doz., 7 lbs., excepting Belladonna Major which weigh 1 lb. to 3 lbs. each according to size.)

Belladonna Major: large beautiful rose pink trumpet shaped flowers, bloom in August and September. 10c each; \$1.00 per doz.; 15c each; \$1.50 per doz.; according to size.
Johnsonii: very large rich crimson scarlet flowers with a white stripe down the center of each petal. 35c each; \$3.50 per doz.

Vittata Hybrids: beautiful striped, flaked and feathered varieties. Flowers are 8 to 10 inches across and borne on stems 2 to 3 feet high. 50c each; \$5.00 per doz.

Lilies

Lilies are matchless amongst hardy plants for beauty of form and variety of color. They commence flowering in June and with various varieties continue blooming until the fall. They succeed better in partial shade and require protection from the wind. Set the tops of the bulbs 5 inches below the surface and 12 inches apart. They require a loose soil with good drainage. October and November delivery. (If by parcel post add postage at zone rates, weight 1 bulb postpaid, of 1 doz., 3 lbs.)

Auratum (Golden Banded Lily): the grandest of all hardy lilies, with large graceful flowers of an ivory white color, thickly studded with chocolate crimson spots and a bright gold band through the center of each petal. **15c** each; **\$1.25** per doz.; **\$8.00** per 100; **20c** each; **\$2.00** per doz. **\$12.00** per 100 according to size.

Auratum Pictum: similar in form to the Auratum, but tipped with crimson at the ends of the yellow rays, **25c** each; **\$2.50** per doz.

Auratum Platyphyllum: similar to Auratum, but larger and finer in all respects. Especially noted for its broad lustrous leaves, which give double attraction. The petals are studded with crimson chocolate spots. **25c** each; **\$2.50** per doz.

Auratum Rubro Vittatum: one of the finest of all lilies. Its crimson band running through the middle of the petal is so broad that the petals appear to be crimson margined with white; very showy and handsome. The flowers are 10 to 12 inches across, of bright, crimson and white. **50c** each; **\$5.00** per doz.

Brownii: large trumpet shaped flowers, pure white inside and rich purple outside. **50c** each; **\$5.00** per doz.

Candidum (St. Joseph or Madonna Lily): a very hardy early flowering lily. The pure white flowers are fragrant and are borne on long stems. The best white lily to plant out of doors. (Order in September as bulbs must be planted early.) **15c** each; **\$1.25** per doz.

Hallawell's Quality Pansies

Pansies thrive best in a partially shaded location, and in a loose soil, well enriched with decayed manure, which should be well dug into the soil. Sow the seed in the fall for early spring blooming. The seed should be sown in boxes, covering them not more than four times their diameter and firming the soil well above them. Do not allow the seed to dry out. The plants must be transplanted twice in order to get the largest flowers; once from the seed box to a sheltered bed and again to the open ground. For best results you must start a good strain. The finest Pansies are, as a rule, shy seeders, which accounts for the difference in price of the various mixtures offered.

Early Scarlet Turnip Radish

Lawn Grasses

All our lawn grass seeds are re-cleaned and of the very best grade. They can be sown in California any time of the year providing there is plenty of water available. Prepare the ground by digging and fertilizing thoroughly with well-decayed manure and then rake the surface smoothly. Scatter the seed evenly and rake it in so that it will be covered lightly. After sowing, the ground should be rolled in order to press the seed firmly into the soil. Water daily until well started. One pound of seed is required for 250 square feet of lawn. If wanted by mail add sufficient postage to cover cost of same.

Kentucky Blue Grass: Fancy. Extra clean. The most popular grass for lawns. It is dark green and of dense growing habit, making a beautiful turf in a heavy or black soil. Per lb., 25c; per 100 lbs., \$20.00.

Shady Nook Mixture: This Mixture contains grasses for making good lawns in shady places and under trees. Per lb., 50c.

Hallawell's Evergreen Lawn Mixture: A mixture of several deep green grasses which makes a thick sturdy lawn, remaining green both summer and winter. It is especially adapted for heavy or black soils. Per lb., 35c.

Pacific Rye Grass: This grass is similar to the Australian Rye Grass, but has a finer leaf and is longer lived. Per lb., 25c; per 100 lbs., \$20.00.

White Clover: Of dwarf habit with creeping stems, rooting at the joints, on which account it makes an excellent turf that stands constant tramping. Planted for a lawn either alone or in mixture with grass seed. Price per lb., 50c.

Australian Rye Grass: A very vigorous, quick-growing lawn grass, but a little coarse. Very satisfactory for lawns in San Francisco. Per lb., 15c; 100 lbs., \$10.00.

High Grade Fertilizers

The Pacific Guano & Fertilizer Co.'s Lawn Dressing: For lawns use 2 to 3 pounds to 100 square feet. Sprinkle the lawn lightly after applying fertilizer. Potted plants should be given not more than one to three teaspoonfuls per cubic foot of soil; shrubs from ½ to 1 lb., according to size of shrub. 10 lb. bag, 60c; 25 lb. bag, \$1.25; 50 lb. bag, \$2.00; 100 lb. bag, \$3.50.

Bone Meal: 5 lbs., 25c; 50 lbs., \$1.50; 100 lbs., \$2.50.

Pure Ground Blood and Bone Meal: Finely pulverized; excellent for rose-culture. It decomposes very rapidly, and is more quickly effective than the coarser grades. It is excellent for mixing with the soil for potting. 5 lbs., 25c; 50 lbs., \$1.75; 100 lbs., \$3.00.

Wizard Fertilizer: For lawns use 1½ lbs. to 100 square feet. For potted plants use a teaspoonful to every 2 qts. of soil. 2 lb. cartons, 25c; 25 lb. bags for \$1.50.
